

## We Now Have Motors

Stromquist is pleased to announce that we have added Teco-Westinghouse motors to our product lineup. We now have available single and three phase, 1/3 - 2000 HP motors for fans and blowers, compressors, pumps and other HVAC equipment.

If you would like to get a quote on a motor, we will need you to provide the following information:

HP: \_\_\_\_\_ Speed: \_\_\_\_\_

Voltage: \_\_\_\_\_ Enclosure: \_\_\_\_\_

Frame: \_\_\_\_\_ Premium Efficient? \_\_\_\_\_

To learn more about Teco-Westinghouse motors, go to [www.tecowestinghouse.com](http://www.tecowestinghouse.com).

## TAC Forta Actuators

TAC Forta non-spring return actuators are designed to mount on TAC's line of 2- and 3-way globe valves. They can easily mount to Johnson Controls, Honeywell, Siemens and Robertshaw globe valves with a simple adapter kit. Only TAC Forta can handle every standard proportional and floating control input signal with just the flip of a switch. The "One Touch" automatic input scaling allows the actuator to learn the valve stem's travel and scale its input signal to match. It can accommodate stroke lengths of 3/8" to 2". Three models deliver a full range of 90 lbf to 337 lbf linear force for 1/2" to 6" globe valves.

When you need control for chilled water, hot water and steam HVAC applications, there's only one name to remember:

**F**lexible Inputs  
**O**ptimized Performance  
**R**eversible Control  
**T**ough Construction  
**A**daptable

## Training Opportunities

### Basic Pneumatics

October 5 & 6

\$350

You will work hands-on with pneumatic equipment to learn the fundamentals of pneumatic controls. The course will cover limit controls, P.E. switches, solenoid valves, relays, thermostats, valve and damper operations.

### Variable Air Volume (VAV)

October 8 & 9

\$350

You will set up ductwork and connect to actual VAV boxes and practice on the equipment, given hypothetical problems by the instructor. This class will cover air velocity formulas, CFMs, and static pressures.

### Boiler Operator's Workshop

October 12 & 13

\$300

This workshop will focus on how to efficiently and safely operate boilers and features a site visit to learn from a working boiler.

Classes to be held at Stromquist, 4620 Atlanta Road, Smyrna, GA. Prices include all training material plus continental breakfast and lunch each day. For more information or to register for a class, call Edna at 404-794-3440 or e-mail [edna@stromquist.com](mailto:edna@stromquist.com).

## Online Training Videos

Stromquist has begun to produce short training videos to help teach you about particular new and existing products. This will be an ongoing project as we continue to make videos for more products. If you have any suggestions for training videos, please e-mail [stacie@stromquist.com](mailto:stacie@stromquist.com). As new videos are made, the links will be posted on our website at [www.stromquist.com](http://www.stromquist.com). Take a few minutes to check out what we have so far:

## A Touch of Italy - Pietro Fiorentini

Stromquist has added a new line of gas regulators to our already extensive offering. The Pietro Fiorentini Governor gas regulators are ideal for all burner installations and low pressure gas distribution systems. They feature a double diaphragm for added security and an integral vent limiter that eliminates the need for costly piping for indoor installations. All Governor regulators are equipped with a balanced valve design for high outlet pressure accuracy regardless of any inlet pressure variation. These reliable, high performance regulators provide a great quality at a very economical price.

### Other Features

- Inlet pressure: 4" w.c. to 7 psig
- Outlet pressure: 2" w.c. to 4.34 psig
- Natural Gas, LPG, Propane-air and any non corrosive gas
- Size range: NPT threaded 1/2" - 2"; Flanged 2 1/2", 3", 4"
- Straight-through or angle connections (1/2", 3/4", 1")
- Two active outlets (1/2", 3/4", 1")
- Mount in any position
- Upstream and downstream test ports

## Honeywell Goes Smaller

Honeywell's SmartDrive Compact VFD is a true "micro" VFD and is available with a wide assortment of customizable options. It isn't overloaded with features you won't use, but you aren't limited to just a few. Instead, it provides the perfect balance with essential features like a standard PI Controller and the ability to program without the need for line voltage. From there, SmartDrive lets you choose only the options you need to meet your application.

Because it is among the smallest, most streamlined VFDs on the market, the SmartDrive saves space in your equipment cabinet as well as saving you money. You choose only the options you need, so you save money to keep your installed cost low. And with the intuitive user interface you save time on commissioning.
